

The LifeGuard range of wearable devices has been carefully selected and tested to help support real life family needs.

## HELPING FAMILIES STAY CONNECTED

### Mobile & PC App

The self-managed mobile app means you are informed about the user location and device status as you require. Track, monitor or talk to your loved one, its all at your fingertips.

### GPS Location

Each wearable is equipped with a 4G SIM and is GPS enabled. These devices will accurately pinpoint the user's location, providing critical life-saving information when urgent action might be required.

### The Right Fit

Different needs require different strategies. Working with you to find the right solution is what we do. Our one month free trial is the best time to find the right fit for your needs.
