& Support

Do you ever leak a small amount of urine when you laugh, cough, sneeze, move, exercise, or during sex?

YES

NO

Do you experience dribbling after passing urine?

YES

NO

Do you often feel a sudden, urgent need to pass urine (more than 7 times during the day or more than 3 times at night), and sometimes cannot reach the toilet in time, resulting in urine leakage?

YES

NO

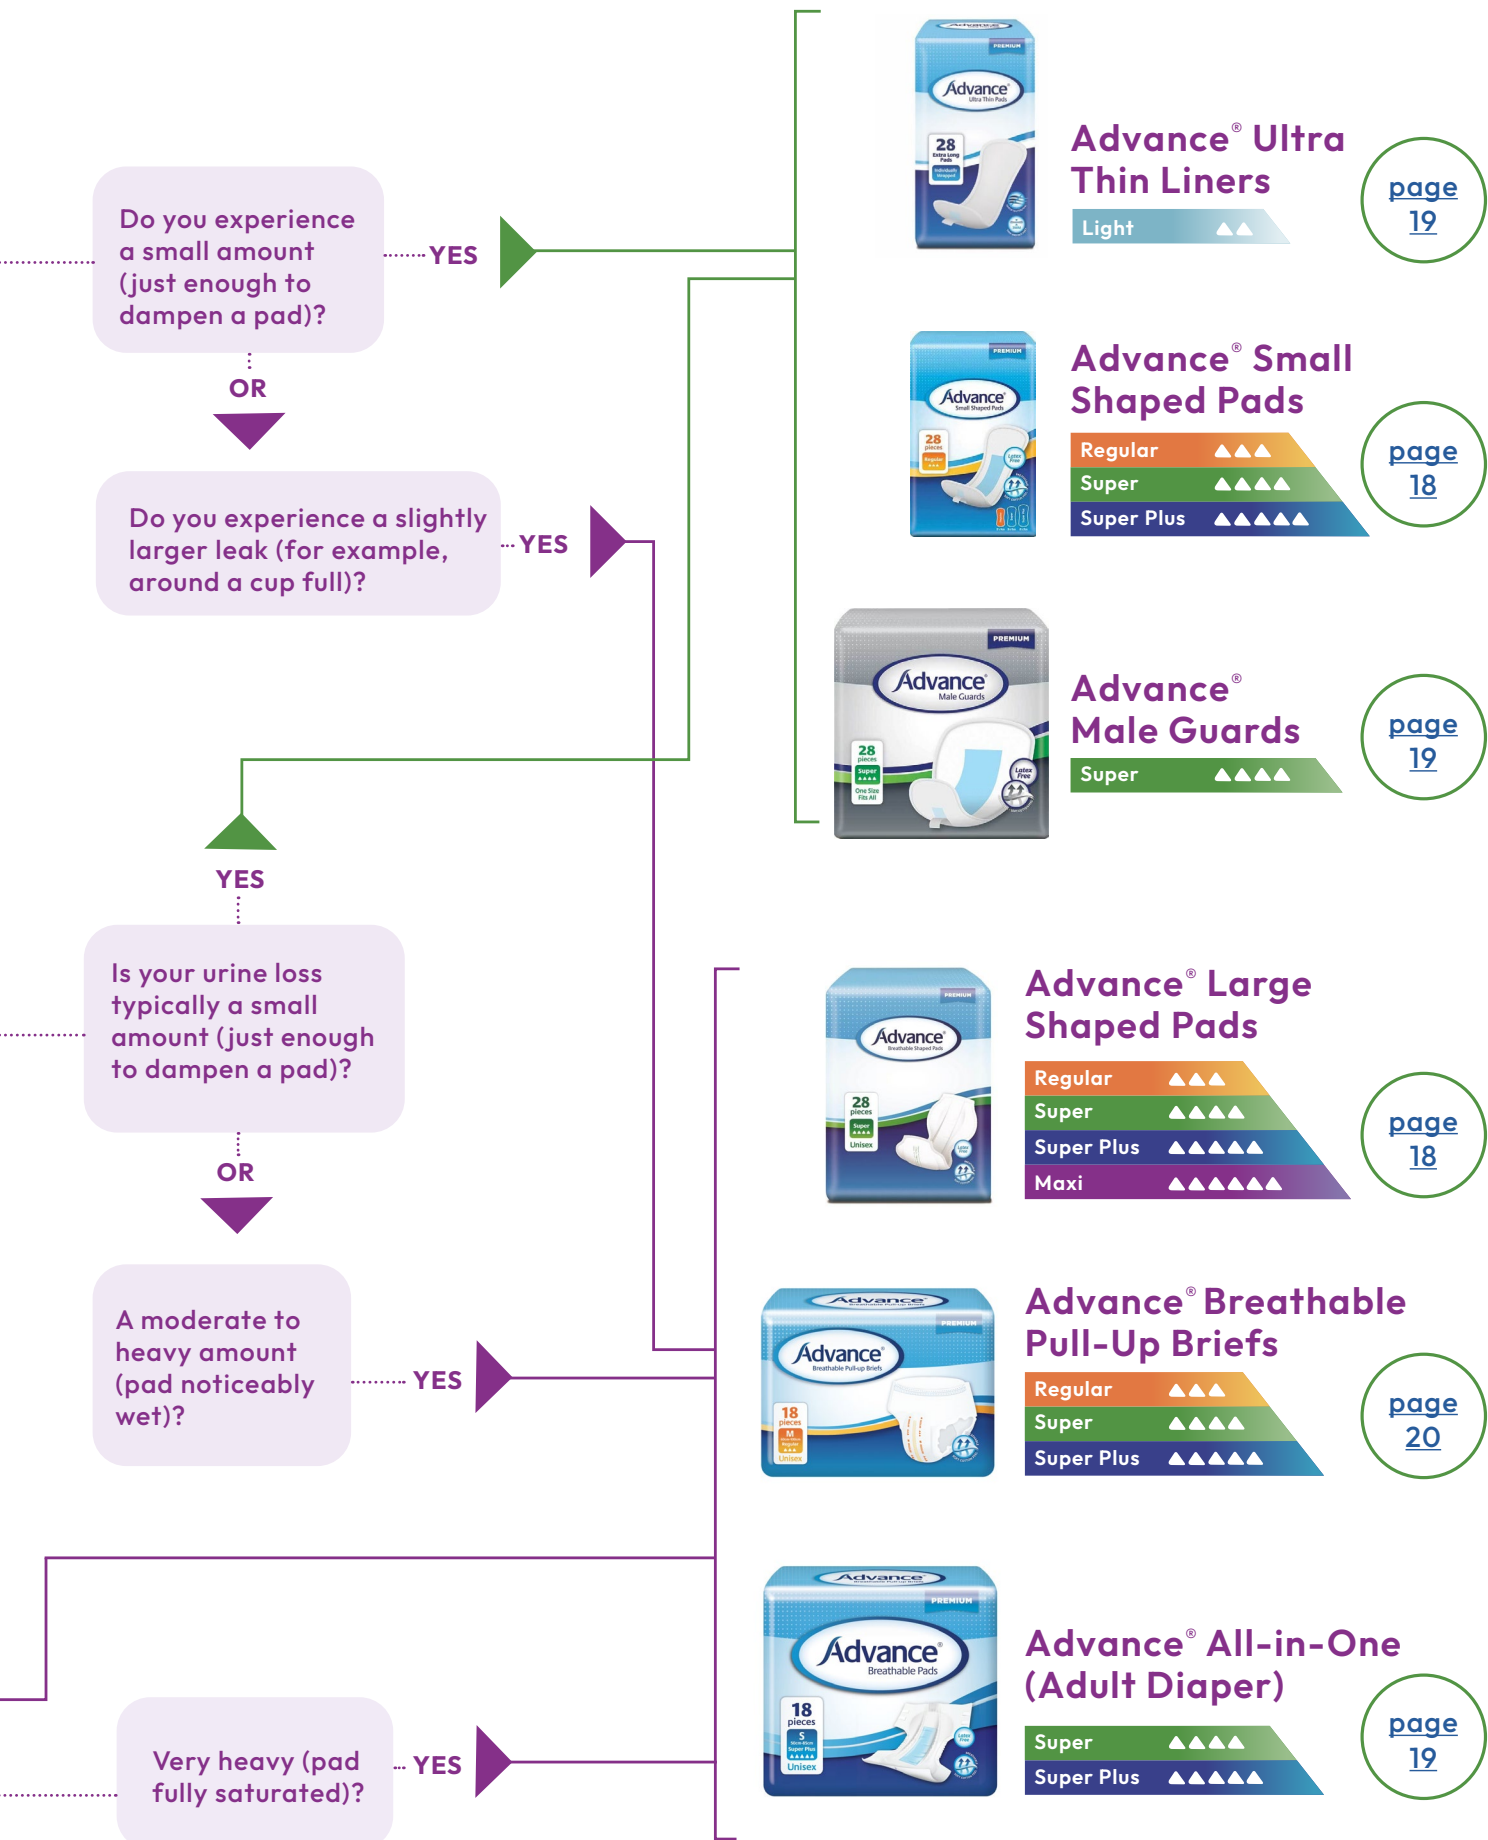

Does your bladder sometimes empty without warning or sensation, or are you unaware that you are passing urine?

YES

Is your urine loss typically moderate to heavy (pad wet)?

YES

OR

UNDERSTANDING INCONTINENCE

Types of incontinence

Knowing the type of incontinence you are experiencing can help you find the best product. Here's a simple guide:

Stress Incontinence

Leakage when coughing, sneezing, laughing, or exercising.

Urge Incontinence

A sudden, strong need to go, sometimes without enough time to reach the toilet.

Overflow Incontinence

A constant dribble caused by the bladder not emptying fully.

Functional Incontinence

When physical or thinking challenges make it hard to get to the toilet in time.

Mixed Incontinence

A mix of two or more types (often stress and urge together).

Remember: Everyone's experience is different. The important thing is finding solutions that support your needs.

Treatment or medication may help manage or resolve certain types of incontinence. We recommend seeking personalised advice from a qualified healthcare professional.

Understanding urinary and bladder incontinence

Urinary incontinence is when you accidentally leak urine. It's very common, affecting people of all ages, and you're not alone.

It might happen when you laugh, cough, or exercise, or you might feel a strong urge to go and not quite make it.

Many people find their symptoms can be managed with the right continence products, daily habits, and support. Our team is here to help you find solutions that work for you, so you can continue living life to the fullest.

Understanding faecal and bowel incontinence

Faecal incontinence is when it's difficult to control bowel movements. It can happen for lots of reasons, after surgery, illness, or changes in muscle strength. We know how sensitive this issue is.

ContinenceCare offers discreet products like our popular Advance® Breathable Pull-Up Briefs, designed for comfort, security, and confidence, along with a range of supportive hygiene products to help you manage comfortably and with dignity.

If you're unsure which products might suit your needs, our friendly team is only a call or click away.

Foods and drinks that can irritate the bladder

Some foods and drinks can make bladder symptoms worse. Here are a few common triggers to watch for:

- ☞ Caffeinated drinks (coffee, tea, energy drinks)
- ☞ Alcohol
- ☞ Carbonated (fizzy) drinks
- ☞ Citrus fruits (like oranges, lemons, limes)
- ☞ Spicy foods
- ☞ Chocolate
- ☞ Artificial sweeteners

It's a good idea to keep track of what you eat and drink to notice any patterns. Every person's body reacts differently, what bothers one person may not affect another. Small changes can sometimes make a big difference!

HOW TO CHOOSE THE RIGHT PRODUCT

Choosing the right care for you

Finding the right product depends on your level of urine loss, your lifestyle, and what feels most comfortable for you.

Here's a simple guide to help you choose with confidence.

Absorbency	Level	What it feels like	Product suggestion
Regular ▲▲▲	Light	Small drips or dampness	Liners, small shaped pads, male guards
Super ▲▲▲▲	Moderate	Noticeable leaks, dampening underwear	Pull-up briefs, larger shaped pads
Super Plus ▲▲▲▲▲	Heavy	Full bladder loss or saturated pads	All-in-One (Adult Diaper), boosters, pull-up briefs

Pull-Up Underwear

- For moderate leaks or urgency
- Easy to pull on and off like normal underwear
- Good for active people who want more security

Booster Pads

- For extra absorbency
- Used inside other products (like a pull-up or All-in-One)
- Great for night-time or heavy loss situations

All-in-One (Adult Diaper)

- For heavier urine loss
- Adjustable tabs for a customised fit
- Best for overnight use or when help with changing is needed

Pads

- For small, occasional leaks
- For drips and dribbles (light bladder leakage)
- Ideal for daytime use and discreet protection

MANAGING HEAVY INCONTINENCE AND OVERNIGHT WETTING

Solutions for better sleep, greater comfort, and less disruption

Heavy wetting overnight can be one of the most common concerns for people managing incontinence, and it's one of the hardest to deal with. Interrupted sleep, discomfort, extra laundry, and skin irritation are just some of the impacts. Whether you're supporting someone else or managing your own needs, heavy wetting overnight can feel overwhelming.

At ContinenceCare, we understand how important it is to feel secure and confident especially at night. This section offers practical guidance, product combinations, and reassurance to help manage heavy incontinence / wetting overnight with comfort and dignity.

Why overnight care needs a different approach

During the day, incontinence can often be managed with regular product changes and lower absorbency products, but at night things are different. You need high absorbency products that allow an uninterrupted rest, do not leak, hold position during movement, and keeps skin dry without irritation. That's where the right product combination makes all the difference.

RECOMMENDED COMBINATIONS

What products work best for overnight wetting?

If you're managing independently:

- ☞ **Advance® Pull-Up Briefs** - easy to wear and change
- ☞ **Advance® Booster Pads** - extra absorbency without bulk
- ☞ **Advance® Underlays** - added confidence overnight

Advance® Booster Pads can be comfortably placed inside your pull-up brief or All-in-One (Adult Diaper). They're highly absorbent, soft and thin making them ideal for overnight protection, even for active sleepers. In addition to providing a significant increase in absorbency they keep skin dry, reduce odour, and provide extra peace of mind for uninterrupted sleep.

If you have a carer or overnight support:

- ☞ **Advance® All-In-One (Adult Diapers)** - for a secure, comfortable fit
- ☞ **Advance® Booster Pads** - to increase absorbency
- ☞ **Advance® Underlays** - for added bed protection

These products work together to help reduce leaks, odour, and the need for overnight changes, making care easier and more restful for everyone.

“

These were great my 99 year old grandmother said they were very comfortable to wear and they held all the accidents in no1 and 2s even overnight so was very pleased and fast shipping thank you.”

– Mavis H

“

Soft comfortable and a full nights sleep with no leakage even when you sleeping on your side.”

– Neil B

“

I sleep through the night now. No leaks, no changes, no laundry at 2am.”

– Mark R, caregiver

Pull-Up or All-in-One (Adult Diapers)?

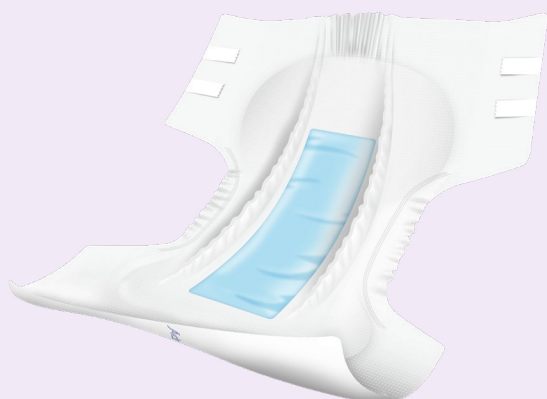

Not sure which might be right for you?

If you're able to manage changes yourself, Advance® Pull-Ups are a great everyday option for both day and nighttime use: they're easy to wear, discreet, highly absorbent, contain faecal incontinence and feel just like regular underwear.

If you have carer support and experience heavy wetting and/or faecal incontinence especially overnight Advance® All-in-One (Adult Diapers) offer a secure fit with adjustable tabs that make changing easier, especially when lying down or seated.

Still not sure? Or if your current product isn't working, call us on 0800 72 38 72, we'll help match you with a high-quality Advance® product.

Advance® Underlays – Absorbent surface protection

Protect bedding, chairs or wheelchairs from incontinence with the highly absorbent range of Advance® Underlays ([pg 21](#)). The Advance® Underlay Plus (with side-tucks) keeps the large absorbent area secure on a bed as the sides can be tucked in. All Advance® Underlays have a soft dry-feel highly absorbent top layer to absorb and lock away fluid with a light blue waterproof back sheet that holds the product in place.

ADVANCE® BOOSTER PADS

Extra protection, exactly where it's needed

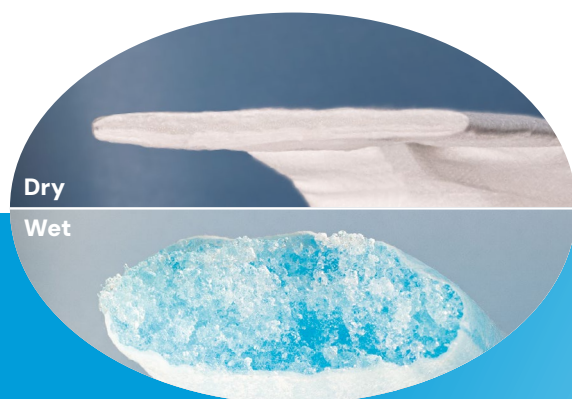

Advance® Booster Pads are an extra layer of absorbency, not a product to be used alone. They're designed to be worn with other Advance® products (pull-ups or All-in-One/Adult Diapers) and boost absorbency, ideal for heavy wetting and heavy overnight incontinence.

- ⌘ **More absorbency, less bulk:**
Super Absorbent Polymer core technology holds more without feeling heavy
- ⌘ **Stays dry longer:**
Moisture turns to gel, so skin stays dry even under pressure
- ⌘ **Fewer disruptions:**
Less need to change at night = more restful sleep
- ⌘ **Odour control:**
Locks in liquid, lowering pH and stopping odour-causing bacteria
- ⌘ **Secure fit** Adhesive backing keeps the booster pad in place
- ⌘ **Targeted support:**
Place at the front for men, centre for women

Booster Pads

Absorbent Polymers (SAP)

Fluff pulp + Super Absorbent Polymers

See the full range of prices and sizes on page [19](#)

Benefits of Advance® Booster Pads

FEWER CHANGES

Extra absorbency means fewer changes - especially overnight - for better, more restful sleep.

REDUCE COSTS

Advance® Booster Pads help reduce costs by lowering product use, cutting accidents, and minimising laundry.

ODOUR CONTROL

The super absorbent core locks in liquid, lowers pH, and helps prevent odour-causing bacteria.

NO WETNESS

Urine is quickly absorbed and turned into gel, so skin stays dry even under pressure.

GENDER TARGETED

For best results, place an Advance® Booster Pad at the front for male users, and in the centre for females.

COMFORTABLE DESIGN

Our unique design with a Super Absorbent Polymer (SAP) core delivers less bulk and up to 100% better absorbency.

SIZING, SAMPLES & SUPPORT

Fit & Absorbency

Continence product sizes are about fit not absorbency. Choosing the correct size ensures a secure, comfortable fit. Use the ContinenceCare Size Guide or speak with our experienced team for personalised support.

A bigger size of product does not mean greater absorbency.

ContinenceCare offers different absorbency levels across a range of product sizes. If you need a more absorbent Advance® Pull-Up Brief product in medium, keep the same size and choose a higher absorbency, e.g.

increase absorbency from **Super** ▲▲▲▲ to **Super Plus** ▲▲▲▲▲

Found the perfect product through ContinenceCare. Very friendly and helpful. Received a call from the Rep to check that everything had arrived and did we need anything else. It was great to be able to easily set up a standing order through their online ordering portal which is super easy to use..”

– Marina H

It's easy to set up: Simply select the Auto-Ship option at checkout, or contact our friendly team to help you set it up.

FUNDING SUPPORT

Help is available – let's find the right support for you

Managing the cost of continence products shouldn't be a burden. In New Zealand, funding support may be available to help cover your needs — whether you require short-term help or ongoing assistance.

Our team is here to guide you through the options and help you access the right products, including the Advance® range, which is available through District Nursing and ACC Nursing services throughout Aotearoa.

Funding options

Disability Allowance

If you have a long-term need for incontinence products, you may be eligible for a Disability Allowance through Work and Income New Zealand (WINZ). This allowance can help with the cost of continence supplies needed for daily living.

To apply:

- 🔗 Speak to your GP or medical specialist, they can complete a Medical Certificate for your application.
- 🔗 Contact Work and Income to begin the Disability Allowance process.

Need a WINZ quote?

We can provide a quote to support your Disability Allowance application — just get in touch.

DHB/ACC Funding

If your incontinence is the result of an accident or medical condition, you may also qualify for support through your District Health Board (DHB) or ACC.

Funding availability varies depending on your region and personal circumstances.

ContinenceCare can help guide you toward the right channels if you're unsure where to start.

All ADVANCE® incontinence products are available funded via your local Continence Service

How to order

Order Online

Shop easily and discreetly anytime at:

www.continencecare.co.nz

Order by Phone
